

ROTOGRAVURE PRINTING MACHINE

Technical Specifications :

No. of colors	1 to 10
Web width	600 - 1200 mm
Unwind / Rewind Reel Dia	800 / 800 mm
Unwind / Rewind Core ID	76 & 152 mm
Range of Cylinder circumference	350 - 700 mm
Dimension	L/B/H/ (As per No. of colors)
Material to Handle	BOPR PET, PE, AL, FOIL PAPER

PAPER BAG MAKING MACHINE

Paper Bag making machine is designed to manufacture flat and satchel paper bags from kraft paper, greaseproof, white paper and poster etc. in different sizes for packing confectionery, food stuff, ready-made garments, tobacco, tea powder, groceries, dry cleaners etc.

General Feature : Paper Bag making machine is made of rigid and robust construction to avoid vibration. All papers are arranged in most accessible way thus making operation and adjustment very simple and quick so that even an unskilled labour can easily operate the machine successfully. The change of size is very easy and can be done in a few minutes. The machine is supplied with one size plate and one size gears for one size of paper bags. Different size plates and size gears for flat and satchel bags are available at extra cost. The width of paper reel to be fed on the machine can be calculated as under -

FLAT BAGS : Twice the bag width plus 2 cm for centre seam.

SACHEL BAGS : Twice the bag width plus 4 times depth of gusset plus 2 cm for centre seam.

Bag Formation : the required size of bags is obtained by fixing the exact size plate for flat or satchel to the size plate holder and the length of the tube is obtained by changing the size gear wheel, each tooth of which, represents one centimeter in length. The tubing after being cut by the beater into exact size as per the size gear is carried forward by means of conveyor rollers to the delivery cylinder.

The Delivery cylinder : is also the bottom folding and pasting cylinder. As the bottom fold is made in the bag, it is pasted and the bag is carried by the folding cylinder to the delivery table where it is released and delivered in a vertical stack.

Printing Attachment : Our two or four colour flexo printer can be coupled with the Paper bag making machine, Available in three sizes (deluxe model, medium and baby model)

Flexo Printer (2/4 Colour Printing)

PAPER NAPKIN MACHINE

Size : 9" to 12" Napkin Each Printing Unit Consists of - Stereo Cylinder changeable from 9"x12", Forward & Backward adjustment, one Ink Roller dipped in duct.

Colour of Printing : Double colour Flexo-graphic Printing
Motor : 2 HP DC Motor with DC Drive (1Phase)

Speed : 275 to 300 Sheets /Min.

Weight : 2200 Kgs (approx.)

Man Power : One Operator & 2 Packers

Raw Material : Tissue Paper 18 to 27 gsm.

Max. Unwind Dia : 40" Max.

Dimension : 110" x 85" x 80" (L x W x h)

Embossing Unit : One Male Female Embossing set (Design as per your requirement) Available with single/double embossing.

Folding Unit : Rotary cutting system
* One Drum for 1/4 Folding
* Digitally counting with Totaliser
* Attachment with Anti - static Eliminator Accessory
* One Cutter Set
* Complete set of Printing block rollers.

TOILET ROLL MACHINE WITH EMBOSSING

Size : 81 cm working

Slitting distance : 99 mm

Cutter : 8 Rotary Cutter with Holder & Bottom

Perforation : Repeat on 110 mm above

Motor : 2 HP DC Motor with thyristor control drive

Maximum rewind : 200 mm.

Speed : 2,000 to 2,500 Rolls / 8 Hrs / 100 gm.

Unwind Station : One

Weight : 1100 Kgs / Approx.

Man Power : One Operator & One Packer

Raw Material : 14 to 26 gsm. (2 ply)

Maximum unwind Dia : 1200 mm Max.

Dimension : 80" L x 50" W x 40" H (Approx)

Counting : Auto cut Digitally Counting

Embossing : Attachment with mechanical Embossing (Metal to rubber) design as per requirement
